Experience

Junior Front-end Developer

JK2L2
May 2024 - Present

- Built internal dashboards for Surf2Sawa, Sky Cable and Personal Collection which allows users to interact with the data using technologies such as Typescript, Vue, Bootstrap, CSS and more
- Enhance websites through improving performance with data caching and user accessibility with mobile responsive design and readable UI.
- Work alongside with the quality assurance team and UX/UI designers to integrate Figma designs.
- Update websites with new features and APIs created by back-end developers.

Selected Projects

Surf2Sawa Website

- Implement Figma and Photoshop design for Surf2Sawa from UX/UI designers into a responsive website and fits into the standard of Converge Brand Identity such as the proper font and logo.
- Edit Photoshop assets such as gradient backgrounds and image effects to match the intended design in Figma.
- Adjust assets and text with HTML and CSS to fit the design with any device.

Chatbot

- Create the design for S2S Chatbot
- Integrate API for Chatbot which allows Surf2Sawa subscribers to inquire on their account.
- Built different chatbot versions into the Surf2Sawa Website and Ticketing.

Surf2Sawa Ticketing

- Improve the performance of the website through caching constant data such as departments and priority level.
- Migrated the ticketing website from Vue 2 to Vue 3 with an updated template and improved code and UI.
- Added new features for the websites such as creating an Excel file for the tickets and updating tickets.
